Breaking News for the Medical Doctors in Laser Surgery!

By 1SirSmith | Posted December 2, 2010 | Warrenville, Illinois

Magic or Method? Most individuals would call them cherubs of the holies of the Tabernacle. Israelites call the Ark a weapon much like the laser for surgery is a weapon to correct injuries to the body. We take for granted the gifted assets doctors acquire through their training and experience for the greater good of mankind. Dr. Brian J. Albers and Dr. Daniel S. J. Choy are masters of their profession who follow a divine plan everyday to help their patients have a healthy and happy life. I believe doctors "Above the Grail!" deserves to be considered for a Nobel Prize in medicine for their persistent and positive influence in the community and in the world.

On October 1, 2009, Dr. Daniel S. J. Choy and Dr. Brian J. Albers have contributed a remarkable discovery to the medical industry with laser surgery that Percutaneous Laser Disc Decompression is 100% successful. A patient Miss Sheryl Smith was in a tragic accident on February 1, 2003, that left her vertebrae C 5-C6, T7-T8, L1-L2, L2-L3, L3-L4, and L4-L5 in a disarray which caused numbness and gradual loss of use of arms and legs and lower organ extremities. Miss Smith's automobile was hit from behind going south on Highway 421. On October 1, 2009, Miss Smith was in an accident stopping at a 4-way stop which Miss Smith was hit in the right back passenger rear wheel and trunk that caused damage to her C4-C5, C5-C6, and C6-C7 which surgery hasn't been performed yet due to insurance delay. The MRI for October 1, 2009 confirmed total success of 100% for Dr. Choy's surgery on 12-23-2004. Dr. Brian J. Albers and Dr. Daniel Choy are excellent surgeons. Dr. Brian J. Albers assisted in Indiana with Miss Smith's care while Dr. Daniel Choy performed the surgery in New York.

The book, "Above the Grail" is a dedication to these two doctors, Dr. Daniel S. J. Choy and Dr. Brian J. Albers. First, Daniel S.J. Choy, M. D. is an elite doctor that pioneered Percutaneous Laser Disc Decompression (PLDD) in 1986 at Columbia University and performed the first procedure at the Neurosurgical Institute at the University of Graz, Austria that same year. Dr. Choy is an elite doctor on staff at Columbia University College of Physicians and Surgeons and the Lenox Hill Hospital in New York City. Second, Brian J. Albers, M.D. is an elite doctor in the field of General and Vascular Surgery at Rush Memorial Hospital in Rushville, Indiana; Margaret Mary Hospital in Batesville, Indiana; and Decatur County Memorial Hospital at Greensburg, Indiana. Both Dr. Daniel S. J. Choy and Dr. Brian J. Albers are members of the American Medical Association. Dr. Daniel S. J. Choy has taught over 300 neurosurgeons and orthopedic surgeons world-wide

Miss Smith got a second opinion from Dr. Daniel S. J. Choy, even though, her insurance said it was unnecessary. The phenomenal surgery performed has changed my life from being in a wheelchair to running around and having a normal life. Percutaneous Laser Disc Decompression (PLDD) is a minimally invasive medical procedure that uses a laser beam to treat back pain caused by a herniated disc. The half-hour treatment is performed on an out-patient basis using only local anesthesia and provides instant relief to the patient. The procedure was developed by Dr. Daniel S. J. Choy at the St. Lukes-Roosevelt Medical Center, Columbia University, the University of Graz (Austria) and at the Laser Spine Center in New York. Dr. Choy has trained over 300 neurosurgeons and orthopedic surgeons in the PLDD technique.

Recommendation for Nobel Prize

Dr. Brian J. Albers and Dr. Daniel S. J. Choy are elite surgeons who should be recognized world-wide for their contributions to medicine in the field of laser surgery. Laser Surgery will be technology that is necessary in the future in order, for medicine to grow. These two doctors will lead my other physicians to many medical breakthroughs.

Dr. Brian J. Albers, M. D.

General & Vascular Surgery

374 Northside Drive, Suite E

Batesville, IN 47006

Telephone (812) 933-1600 Fax (812) 933-1636
